AMENDMENTS TO THE CLAIMS

Claims 1-60 (Previously Canceled)

61. (Currently Amended) A computer-readable medium on which is encoded a computer program, comprising:

code for creating a representation of a haptic feedback device memory in a computer memory;

code for storing a hapticforcee effect in a cache allocated in said computer memory;

code for determining whether said haptic feedback device memory can store said hapticforcee effect by examining said representation of said haptic feedback device memory;
and

code for sending said hapticforcee effect to said haptic feedback device memory.

62. (Currently Amended) A computer-readable medium as recited in claim 61; wherein said hapticforcee effect is sent to said haptic feedback device memory only if said haptic feedback device memory can store said hapticforcee effect.
